Subject: RE: i spoke with Mark McClellen yesterday...

I just found out yesterday that Mark had also called and spoke with Ali Tarquino and George Hartenstein here as well. Might be a good idea for Ali (at least) to sit in on your call as well to see if everyone told Mark the same thing. I could also arrange to include George if you think it would help.

Subject: i spoke with Mark McClellen yesterday...

He was trying to get the scoop on the Hazelton Creek properties/PCB issue...we had a good conversation, and I told him pretty much what I told you i.e. the Region 3 TSCA program has raised issues with regard to beneficial use permits that have PCB limits that would run afoul of TSCA under normal circumstances.....i am getting a clearer picture of whats going on, but still have not heard back from Region 5- let me know a good time to talk and I'll at least tell you what I discussed with Mark. I still plan to talk about it at the end-of year and I still working on getting some background material to you before then

Thanks, Walt
